

AL-AIN MUSEUM AI-POWERED HIRING

A focused recruitment initiative to attract and develop Emirati talent in heritage, archaeology, and museum practices—supporting the museum’s reopening through structured opportunities and innovative technology.

TARGET AUDIENCE
Fresh Graduates and Alumni

THE CHALLENGE
The team faced a tight recruitment window with **50 roles** to fill, requiring rapid review of a high volume of applications.

THE SOLUTION
An AI pre-screening bot was deployed to guide applicants, filter out ineligible candidates, and reduce repetitive inquiries.

THE IMPACT
The bot streamlined shortlisting, improved candidate quality, and allowed the team to meet deadlines with focused communication.

empower better hiring
decisions

The Al-Ain Museum AI powered interviewing process proves an AI voice agent can screen faster, cheaper, and more fairly while keeping candidates happy. Scaling this playbook across DCT will embed data-driven hiring discipline and release HR capacity for higher-value work. Let’s institutionalize the advantage before competing entities do.
